Objective

A dedicated computer science student seeking an AI Engineer position to leverage machine learning expertise and contribute to cutting-edge AI solutions.

Education

Bachelor of Science in Computer Science

Woosong University

Expected Graduation: 2027

Relevant Coursework: Machine Learning, Algorithms, Data Structures, Python Programming

Experience

AI Development Intern

[Company Name]

[Dates]

- Constructed a predictive model using PyTorch, improving accuracy by 12%.
- Processed large datasets and optimized algorithms for enhanced performance.
- Collaborated with data scientists to deploy models in production systems.

Research Assistant

[University/Organization]

[Dates]

- Supported AI research initiatives focused on natural language processing.
- Analyzed data and presented findings to academic teams.

Skills

- **Programming:** Python, Java, C++
- **AI Frameworks:** TensorFlow, PyTorch
- **Tools:** Git, AWS, SQL
- **Competencies:** Collaboration, Problem-Solving, Communication

Projects

Text Classification Model

- Developed a neural network using TensorFlow, achieving 90% accuracy in sentiment analysis.
- Created data visualizations to communicate results effectively.

AI Chatbot

- Designed an NLP-based chatbot using Python, increasing user interaction by 18%.

Certifications

- Deep Learning Specialization, Coursera, [Year]
- AWS Certified Solutions Architect, [Year]
